Pyriproxyfen 20WG, an insecticide for whitefly control on cotton registered and launch in India

Nihon Nohyaku Co., Ltd. (President: Hiroyuki Iwata; Head Office: Chuo-ku, Tokyo) is pleased to announce that one of our partner companies in India, Rallis India Limited (Head office: Mumbai, Maharashtra State, India) obtained agrochemical registration for pyriproxyfen 20WG (product name; CLASTO®/ ZINGALA®) on March 15th, 2022, as a new insecticide for whitefly control on cotton in India. Rallis India Limited and our subsidiary, Nichino India Private Limited (Head Office: Hyderabad, Telangana State, India) will launch the pyriproxyfen 20WG in this August 2022. Pyriproxyfen is an active ingredient which was originally discovered and invented by Nihon Nohyaku Co., Ltd.

Cotton is one of the most important crops in India, and whitefly is the highest priority pest to control for cotton growers in India. Pyriproxyfen 20WG is highly effective against whitefly which has acquired resistance against various existing insecticides. We strongly believe that pyriproxyfen 20WG will provide Indian growers with a new and the best solution to control whitefly on cotton.

* CLASTO® is a registered trade mark of Rallis India Limited and ZINGALA® is a registered trade mark of Nichino India Private Limited
