1. Overview of Operating Results, etc.

(1) Overview of operating results for the three months ended June 30, 2024

During the three months ended June 30, 2024, the global economy saw varied trends. The U.S. economy continued to expand as personal consumption and capital investment showed an upward trend. In Europe, the economy showed a sign of a rebound due to wage increases and the effects of a cut in interest rates. The Japanese economy continued to be on a gradual recovery path as there were signs of improvement in corporate earnings and employment conditions. Meanwhile, in China, the economy remained unstable as domestic demand continued to remain sluggish due to the effects of the real estate slump.

Under such circumstances, the Group engaged in the initiatives of the new medium-term management plan, "Growing Global for Sustainability (GGS)," and has been aiming to deepen its business strategies, advance its environmental management, and promote human capital management as well as achieve sustainability of both the entire society and the Group.

Major efforts during the three months ended June 30, 2024 included linking our smartphone application "Leime AI Disease, Pest & Weed Analysis" ("Application") with "Z-GIS" provided by the ZEN-NOH under the JA Group, providing our AI disease, pest & weed analysis system for "KSAS," the farm management system of Kubota Corporation, and as part of our efforts to enhance the features of the Application, installing a new AI Forecast function as well as expanding crops for analysis. With initiatives such as the above, the Group promoted and expanded smart agriculture.

For the three months ended June 30, 2024, net sales amounted to 19,241 million yen (down 2,942 million yen or 13.3% year-on-year) as, in the agrochemicals business, the Group's core business, agrochemicals sales to those in the same business in India declined. In terms of profits, operating profit came to minus 164 million yen (down 1,549 million yen year-on-year) mainly due to a decline in sales in India and the impact of a drop in sales prices of some products in Brazil, ordinary profit was minus 143 million yen (down 1,469 million yen year-on-year), and profit attributable to owners of parent was 54 million yen (down 983 million yen or 94.7% year-on-year).

The state of the reportable segments during the three months ended June 30, 2024, is as follows.

[Agrochemicals business]

Regarding agrochemicals sales in Japan, the Company worked to promote and expand the sales of core internally developed products such as benzpyrimoxan, an insecticide for paddy rice, (product name: "Orchestra"). In addition, sales of products of Corteva was robust, resulting in total net sales in Japan exceeding those of the same period of the previous year.

For overseas agrochemicals sales, net sales were strong due to the increased demand for fungicides caused by heavy rainfall as well as our successful efforts on cultivating new business fields for internally developed products, despite the impact of a decline in prices of some of generic agrochemicals caused by intensified competition in Brazil, the world's largest agrochemical market. In North America, sales remained stagnant due to a drop in shipments of some products such as fungicides whose delivery dates had been brought forward at the end of previous fiscal year, among other factors. In Europe, sales of Nichino Europe Co., Ltd. reported increased net sales due to robust sales of herbicides for fruit trees owing to the impact of heavy rainfall mainly in southern regions, despite a decrease in sales of flubendiamde ingredients to Bayer AG. In Asia, sales remained stagnant due to the sluggish sales to those in the same business in India caused by the impact of their inventory adjustments. Consequently, total overseas net sales fell below the figures from the same period of the previous year.

As a result of the above, net sales of the agrochemicals business amounted to 17,732 million yen (down 2,991 million yen or 14.4% year-on-year), and operating profit was minus 238 million yen (down 1,498 million yen year-on-year) mainly due to the impact of the deterioration in profitability in Brazil.

[Chemicals other than agrochemicals business]

In the chemicals business, sales of anti-infective insecticides were strong. In the pharmaceutical business, sales of topical antifungal drug luliconazole for onychomycosis were sluggish.

As a result of the above, net sales of the chemicals other than agrochemicals business amounted to 1,058 million

yen (down 19 million yen or 1.8% year-on-year), and operating profit was 221 million yen (down 67 million yen or 23.2% year-on-year).

(2) Overview of financial position as of June 30, 2024

Total assets as of June 30, 2024, decreased by 8,901 million yen from the end of the previous fiscal year to 149,082 million yen. This was due primarily to a decrease in trade receivables.

Total liabilities as of June 30, 2024, decreased by 9,615 million yen from the end of the previous fiscal year to 67,972 million yen. This was due primarily to a decrease in trade payables.

Net assets as of June 30, 2024, increased by 714 million yen from the end of the previous fiscal year to 81,110 million yen. This was due primarily to an increase in accumulated other comprehensive income including foreign currency translation adjustment.

(3) Explanation of the forecast of consolidated financial results and other forward-looking information There have been no changes to the forecast of consolidated financial results for the fiscal year ending March 31, 2025, announced on May 13, 2024.
